

Program for Advancing Strategic International Networks to Accelerate the Circulation of Talented Researchers  
Japan-ASEAN Collaboration Research Program on Innovative Humanosphere in Southeast Asia:  
In search of Wisdom toward Compatibility Growth and Community in the World

Report

Period of inviting: November 18 – December 27, 2016

Place of accepted: Graduate School of Agriculture, Kyoto University

Name: Ati Dwi Nurhayati, M.Si

Institute/University: Bogor Agricultural University

**Research title: Fire in Tropical Peatland ; Indonesian Cases**

This is my first visit to Japan and I am very honour to be invited by Kyoto University which is the famous and one of the oldest university in Japan. During the period of visit, I collaborate with Prof. Mamoru Kanzaki in The Laboratory of Forest Resources and Society, Division of Forest and Biomaterials Science, Graduate School of Agriculture, Kyoto University. As an introduction, on November 22<sup>nd</sup>, 2016 I had delivered a presentation about “Forest Fire In Indonesia” in a seminar at Laboratory Forest Resources and Society. In this seminar as well to introduce myself, we shared information and discussed about forest fire.

I also delivered presentation at International Workshop The Japan-ASEAN Collaborative Research Program on Innovative Humanosphere in Southeast Asia: In Search of Wisdom toward Compatibility Growth and Community in the World which organized by Center for Southeast Asian Studies, Kyoto University. The presentation is part of a paper with Prof. Kanzaki and Dr. Kanchai titled Fire in Tropical Peatland : Indonesia cases. I was presentation on December 16<sup>th</sup> 2016 at CSEAS Kyoto University (Fig 1).

I had a chance to meet and discussed with Prof Akira Kato from Chiba University (fig 3) who brief me a short explanation on the open access data for mapping related to land use changing. I also visited the University Tokyo to discuss with Prof Satoshi Tsuyuki related to cooperation with Bogor Agricultural University (fig 4).

I would like to extend my sincerest gratitude to Kyoto University (KU) especially to the Secretariat of the Japan-ASEAN Collaboration Research Program for inviting me to this program. It was a very fruitful and rewarding experience, which I believe will be beneficial not only for my research but also to strengthen joint cooperation between Kyoto University and Bogor Agricultural University (IPB).

Finally, I would also thank to Prof Mamoru Kanzaki, my host Professor, who really take care of me during my stay in Kyoto. I am grateful to Prof Bambang Hero Saharjo and Prof Cecep Kusmana who recommended me to visit Kyoto University.

I was so impressed with cultural and the beauty of Japan during fall and winter session. I hope I could pursue my study at Kyoto University to gain more knowledge and borderless sciences.
